Idea 1: _____

Ratings (0-5): customer ____ delivery ____ cash ____ testability ____

Evidence / uncertainty: _____

Idea 2: _____

Ratings (0-5): customer ____ delivery ____ cash ____ testability ____

Evidence / uncertainty: _____

Idea 3: _____

Ratings (0-5): customer ____ delivery ____ cash ____ testability ____

Evidence / uncertainty: _____

Score = sum(rating x weight) / (5 x sum of weights) x 100.

Use integer weights 0-10; at least one positive. Higher ratings mean better fit.

Equal weighted points share rank. Ratings are subjective assumptions.

Scores do not predict demand, profit, funding or business viability.

Next test / owner / cost ceiling / date: _____
